ALARM LOCK

T2 SERIES ELECTRONIC DIGITAL LOCKS

ALARM LOCK

- Continued from previous page.

FEATURES:

- Clutch mechanism offers exceptional reliability and strength.
- Super heavy-duty trim design with self-contained, fully programmable 12 digit metal keypad.
- Battery powered, uses five AA batteries for long-life dependability & audible low power alert.
- Non-handed for easy installation and versatility, retrofit or new.
- 2-wire remote override or key bypass capability.
- Visual and audible entry indicators.
- Available in lever design with rekeyable cylinder or interchangeable core version-core not included.
- UL Listed Grade One lockset with fire rated latch meets or exceeds BHMA specifications.

12 KEY PROGRAMMABLE ACCESS CODES

- Multi-level user capability.
- Master code.
- Manager code.
- Passage function.
- One time emergency or service entrance code-erases from memory after use.
- Timed entry allowance from 5 to 20 seconds.
- Up to 15 different group or individual codes.
- Individual, group or total user lockout code.
- Master and management can temporarily or permanently change any or all user codes.
- Temporarily shuts down if incorrect code is entered three times consecutively..

AK-DL2700LD with LocDown™ Feature Keyfob-Activation & Lockdown Indicator Bar Inside

This lock, part of Alarm Lock's School Security Solution, has the capability of a "local" lockdown and has a wireless remote release built in. The AK-DL2700LD has a new battery cover with an LED light bar that flashes red when the unit is in lockdown.

On the outside of the lock a small indicator light flashes and/or optionally beeps when in lockdown (programmable option).

The 4 button remote, that is included, can be programmed into 4 different locks at the same time for remote release (remote receivers will be needed for non lockdown models). Also, a "lockdown" of up to 4 AK-DL2700LD locks within range (up to 100' away, depending on building construction constrains) can occur with a simple pressing of 2 buttons. Up to 50 keyfobs can be supported on each lock.

The 4 button remote may be used as a momentary release or changed to a "passage toggle" function.

While in lockdown, only the Master code and managers codes will open the door, locking out all basic users.

Operation: Clutch mechanism permits turning lever without retracting latch and reduces stress on lock bodies and spindle. Outside lever free turning in locked position. Entering access code, key bypass, or remote bypass will allow lever to retract latch. Inside lever always instant egress.

Keypad: All metal, 12 button programmable for multi-level access functions including group or individual user codes, master and management codes, passage and emergency or service codes, lockout and remote override capability and allowable entry time from 5 to 20 seconds. 4 different keypad tones and keypad may be silenced.

Order separately.

AK-PG-10

Stock No. **Finish**
AK-PG-10 Metallic Silver

The Pilfergard Model PG10 is an exit door alarm designed to deter the use of the secured door by sounding a twin action alarm when opened by unauthorized personnel. The alarm can be bypassed from inside or outside by the use of a key. (Requires standard mortise cylinder not supplied.) This durable surface mount unit is easily installed and is tamper-supervised with two separate tamper switches. Its test button verifies battery

PG-21 Surface Mounted Microprocessor-controlled Door Alarm

- Standard or Narrow stile door alarm.
- Two selectable arming modes: Always armed or "on/off".
- Piezo electronic 110db (at 10 feet) sweeping siren.
- Visual magnetic alignment mode, eliminates templates.
- Self-contained and tamper switch supervised.
- 9v-battery powered (supplied) with low battery alert.

Cylinder pictured
NOT included.
Order separately.

AK-PG-21

Stock No **Finish**
AK-PG-21 MB Duronodic
AK-PG-21 MS Metallic Silver

Sleek model design key-activated door alarm for use on standard size and narrow stile doors. Unauthorized use of door will cause alarm to sound and will activate the LED indicator. User selectable options include: continuous alarm, minute shutdown with auto reset and exit/entry delay. Only key carrying employees can disable the alarm; uses standard mortise cylinder (not included). (For exterior key control, an optional RIM cylinder may also be used.) Finishes: metallic silver or Duronodic.

ACCESSORIES

Battery Pack (6-Volt)
AK-BP6
