Anti-Shim Technology

Combination Padlocks with Key-Controlled Mechanism. Great for School, Industrial, gymnasium locker rooms.

All features of No. 1500, plus key-controlled mechanism with brass cylinder, nickel-silver tumbler security. Designed for special installations such as schools, industrial plants, gymnasium locker rooms, etc. Not recommended for over-the-counter sales. Special security feature — keyway in back of lock. Individual user operates lock by dialing combination. Authorized person has control key, providing easy access to all lockers (control keys must be ordered separately). Installation record maintained at factory, on factory ordered padlocks, permitting extension system under same key.
